

*NuTex Coatings NuCRETE is a fine cement based render that gives you a smooth fine concrete finish. Available in Grey and Off White only.*

*NuCRETE will naturally weather over time, producing a mottled distressed appearance.*

*If you wish to retain a clean look of NuCRETE you will need to apply Romano Silicon Sealer. This is a clear sealer that won't change the appearance of NuCRETE however it will minimize moisture penetrating the coating thus preserving the new look. Romano Silicon Sealer will need to be re-applied every 12 months.*

*“Please read all data sheets on the NuCRETE system and apply a 1m site sample to make sure all parties are fully aware what the finished product will look like”.*
