

*NuTex Coatings Romano Render is a natural sand, cement and oxide coloured render that gives you a suede weathered appearance*

*Romano Render will naturally weather over time, producing a mottled distressed appearance.*

*If you wish to retain the Natural look of Romano Render you will need to apply a Silicon Sealer. This is a clear sealer that won't change the appearance of Romano however it will minimize moisture penetrating the coating thus preserving the new look. Romano Silicon Sealer will need to be re-applied every 12 months.*

*"Please read all data sheets on the Romano Render system and apply a 1m site sample to make sure all parties are fully aware what the finished product will look like".*
